Status of Seaweed Farming in Region 6

Roed Shane T. Hablo
BFAR Region 6
Molo, Iloilo City, Philippines

Seaweed Production

The annual average production of seaweed in Region 6 from 1995 to 2000 is shown below:

![Bar graph showing seaweed production from 1995 to 2000]

Figure 1. Seaweed production from 1995 - 2000
Source: Philippine Fisheries Profile

The increase in production was due to the provision of technical assistance, extension services and information dissemination which created public awareness towards the use of modern technology on seaweed farming and market demand.

BFAR assisted nursery/demo farms

- Seaweed Nursery Farm - Maniguin Island, Culasi, Antique
- Seaweed Demo Farm - Pulo Piña, Concepcion, Iloilo
- Seaweed Demo Farm - Nadulao Island, San Lorenzo, Guimaras

The demo projects and nursery farms are managed and maintained by the fisherfolk association in the area.
